WORKING EXPERIENCE

- **Nordfin Capital,** *Stockholm Sweden*
  I joined this company as System Developer. I bought all hardware and assembled a computer which I configured as WEB, FTP, SQL and VPN server. I am using bash script to maintain all servers from crontab to backup. I am maintaining website with Codeigniter as the framework and PHP and Javascript as the programming languages.
  System Developer, October 2017 – present

- **Self Employment,** *Stockholm Sweden*
  I was working with Android and Web development.
  Self employment, April 2016 – September 2017

- **DinBox AB,** *Stockholm Sweden*
  DinBox has laundry booking system which allows people to book their laundry time and do their laundry. I was working as full stack web developer.
  Full stack Web Developer, September 2015- March 2016

- **Smartmiljos AB,** *Umeå Sweden*

  The idea of the system was indoor localization system which I developed in ABB. Android phones use Bluetooth to read BLE sensors and get distance to calculate triangulation formula to get the location.

  Android Developer, June 2015- September 2015

- **UpWork,** *USA based outsource company*

  This is outsourcing job so I worked with HTML, CSS, PHP, JavaScript and AngujarJS.

  Full stack Web Developer, January 2009- September 2015

  Profile link: https://goo.gl/EaLOFB

- **ABB,** *Västerås Sweden*

  Indoor localization system, I have done hands free operation which allows to control home appliance(e.g: switch, door lock) as well as current loaction of the user. Frequently update can be shown in web page by using JavaScript and Android. Programming language I used PHP, Javascript, Python, Java, C++ and MatLab.

  Internship, November 2014- April 2015

  Smarter Building Automation System using UWB-based High Accuracy RTLS.

EDUCATION

- **Umeå University,** *Sweden*

  Master's in Computational Science and Engineering, 2011-2014

LANGUAGE PROFICIENCY

- **Fluent in oral and written English**
- **Swedish as average**
