WORKING EXPERIENCE

- **Self employment,** *Stockholm Sweden*
  NodeJS and Flutter, I am wokring on this two area.s I am buiding apps like Uber food and open market place where people can easily open a business and customer can buy products from the business owner.
  August 2020 – August 2021

- **Scrive AB,** *Stockholm Sweden*
  I was working as an Integration Engineer. I started working with PHP, but after 2 months I switched to NodeJS. The job also included work with Docker containers, and API integration.
  Integration Engineer, January 2020 – July 2020

- **Nordfin Capital AB,** *Stockholm Sweden*
  I joined this company as System Developer. I bought all hardware and assembled a system which I configured as WEB, FTP, SQL and VPN server. I was using bash script to maintain all servers from crontab to backup. I was maintaining their website with Codeigniter as the framework and PHP and Javascript as the programming languages.
  System Developer, November 2017 – December 2019

- **Self Employment,** *Stockholm Sweden*
  Take a break from corporate life and visited different part of the

world, work remotely. Mostly working with web back-end development.
Web development, April 2016 – October 2017

- **DinBox AB,** *Stockholm Sweden*
  I have been using JavaScript and PHP as programming language. The goal was to develop the system work faster and smoother. DinBox's product is laundry booking system which takes an hour to update the system. To solve the issue I started working with NodeJS and AngularJS which solved the issue and make it as live update. It was very exciting project. I enjoyed my work so much.
  Full stack, September 2015 – March 2016

EDUCATION

- **Umeå University,** *Sweden*
  Master's in Computational Science and Engineering, 2011-2014

- **East West University,** *Bangladesh*
  Bachelor in Computer Science and Engineering, 2003-2008

LANGUAGE PROFICIENCY

- **Fluent in oral and written English**
- **Swedish as beginner**
