

BYAZIT BOSTAMI, M.Sc.
AI & Platform Engineer | DevOps Specialist

[byazit@gmail.com] • [<https://www.linkedin.com/in/byazit-b-8351a925>] • Stockholm, Sweden

Profile

Versatile Engineer with strong backend development foundation, now specializing in AI integration, platform engineering, and modern DevOps practices. Expert in building scalable, self-hosted solutions using containerization (Podman/K8s), workflow automation (n8n), and local AI models (Ollama). Combines hands-on technical skills with proactive problem-solving for dynamic tech environments.

Technical Skills

AI & Machine Learning

- Local AI Deployment: Ollama, local model management
- AI Development Tools: Cline, Continue.dev, VS Code AI extensions
- AI Platforms: Experimentation with various AI/ML platforms
- Hardware: NVIDIA GTX 1070 workstation for local AI processing

Platform & DevOps

- Containerization: Podman, Podman-Compose, Docker, Kubernetes (k8s)
- Orchestration: OpenShift, Red Hat Linux
- CI/CD: Jenkins, Git, GitHub Actions
- Monitoring: Grafana, SonarQube
- Automation: n8n workflow automation

Programming Languages

- Backend: Node.js, Python, PHP
- Scripting: Bash/Shell, PowerShell
- Frontend: JavaScript, React.js, Flutter/Dart
- Database: PostgreSQL, SQL

Tools & Environments

- Development: VS Code with AI tooling, local Ollama integration
- Server Management: Self-hosted Intel NUC, Linux administration
- Project Management: Agile/Scrum methodologies

Professional Experience

DevOps / AI Engineer | Upwork (Remote)

May 2025 – Present

- Consult clients on CI/CD pipeline automation and containerization strategies
- Develop custom workflow automations using n8n for business process optimization
- Implement local AI model deployments (Ollama) for private development environments
- Advise on cloud-native solutions and modern DevOps practices

Backend Developer | SENICO CONSULTING AB, Stockholm

December 2023 – April 2025

- Developed backend services using Node.js and PostgreSQL
- Migrated legacy PHP codebases to modern Node.js architectures
- Designed and implemented JSON API integrations for third-party services
- Utilized Docker for consistent development and deployment workflows

System & DevOps Engineer | CVITCH AB, Stockholm

April 2022 – November 2023

- Managed platforms on Red Hat Linux and Red Hat OpenShift
- Ensured high availability of containerized applications

5G Network DevOps Developer | Ericsson (via CVITCH), Sweden

September 2022 – April 2023

- Contributed to Ericsson's 5G EWS platform in a 25-developer Agile team
- Developed features using Java for 5G network functions
- Managed deployment lifecycle using Jenkins, Kubernetes, Git, SonarQube, and Grafana
- Collaborated with international teams across Sweden, Canada, and South Korea

Integration Engineer / Full-Stack Developer | Scrive, Stockholm

January 2020 – July 2020

- Transitioned from PHP to Node.js for backend development
- Gained expertise in Docker containers and API integration
- Worked in Agile team environment on scalable solutions

IT Infrastructure & System Developer | Nordfin Capital, Stockholm

November 2017 – December 2019

- Architected and built company's complete IT infrastructure from scratch
- Configured multi-role servers (WEB, ETP, SQL, VPN)
- Automated server maintenance and backups using Bash scripts with crontab
- Developed and maintained company website using CodeIgniter (PHP) framework

ENTREPRENEURIAL PROJECTS (Self-Employed)

August 2020 – April 2025

PrintNow – Photo-on-Demand Service

- Secure photo/document printing service for Bangladeshi diaspora
- Direct-to-printer integration in Bangladesh with no third-party storage
- Tech: Node.js, React, PostgreSQL, Docker

Restaurant Management System

- Real-time dual-app system (customer orders + kitchen display)
- Instant order synchronization between customer and kitchen interfaces
- Tech: Flutter, Node.js, WebSockets, PostgreSQL

Vendor Network App

- Marketplace enabling vendors to create online stores within minutes
- AliExpress-like user experience for small business owners
- Tech: Flutter, Node.js, PostgreSQL, Docker

Cloud Lists – Collaborative App

- Real-time shared list management with email collaboration
- Simultaneous editing and updating across users
- Tech: Flutter, Node.js, WebSockets

Infrastructure Setup

- Self-hosted personal server on Intel NUC
- Docker-based environment for project containerization
- Automated deployment pipelines

AI DEVELOPMENT WORKSTATION

- Dedicated AI development machine with NVIDIA GTX 1070
- Local Ollama model deployment and management
- Integrated with VS Code and AI coding assistants
- Privacy-focused AI development environment

EDUCATION

Master of Science, Computational Science & Engineering
Umeå University, Umeå, Sweden

Bachelor of Science, Computer Science & Engineering
East West University, Dhaka, Bangladesh

LANGUAGES

- English: Fluent (oral and written)
- Swedish: Beginner+
- Bengali: Native fluency
